Don't get me started.

Thanks Howard. I think the worst is over for most of us down here now.

OMG. What a

clusterf@@@!!

I never trusted that methylation signature from Guardant.

Also. Thinking of you and everyone at UF with Idalia. Stay safe !

NRG Oncology **eNews**

## NRG-GI005

### Time Sensitive

August 30, 2023

**This information must be relayed to physicians and patients participating in NRG-GI005 as quickly as possible.**

After the NCI's review of planned interim analysis information for the phase II endpoint for NRG-GI005, the NCI has informed NRG Oncology that **physicians and patients must be informed of the outcome of the NCI's review**. Therefore, the following letters have been prepared to inform investigators and patients, and the letters are posted, along with this notice, to the GI005 page on the [CTSU website](#).

1. Dear Doctor Letter, dated August 30, 2023
2. Dear Patient Letter Template v.1.1 – **Treated**

*This letter **must** be given **as soon as possible** (within the next 30 days of this notice; by September 29) to patients who were randomized to Arm 2 and are currently receiving chemotherapy or have completed chemotherapy.*

1. Dear Patient Letter Template v1.0 – **Non-treated**

*This letter **must** be given as soon as possible (within the next 3 months; by November 30) to patients who were randomized to Arm 1 and patients randomized to Arm 2 who did not receive chemotherapy.*

NRG Oncology has submitted these letters to the CIRB on behalf of participating NRG-GI005 sites; however, please note that **NCI has confirmed that because this is**

**a safety issue, sites do not need to wait for CIRB review/approval to proceed with informing patients and assessing the willingness of patients to continue with the study and/or study-related treatment.**

If you have any questions regarding this information, please contact the Clinical Coordinating Department at 1-800-477-7227 or [ccdpg@nrgoncology.org](mailto:ccdpg@nrgoncology.org).
